

ALL EYES ON THE ELMORE

Could you ask or expect anything more of an automobile than one that can be run continuously on the high gear through crowded streets, rough roads, and up hills without waste energy, with continuous application of power—TWO impulses at every revolution of the fly wheel? Do you fully appreciate the fact that the normal speed of twenty-five to thirty miles an hour of the

PATHFINDER ELMORE

Price Fully Equipped, \$1,250

can be throttled to three miles an hour—In the speed of the car from two to thirty miles perfectly plain to you that with the Elmore excess power, same action, same economy, that you would get with four cylinders

other words, that you can control an hour simply by the throttle? Is it two-cycle engine you get the same constant torque with two cylinders in other cars with 75% less parts?

The Elmore motor is capable of three years service without the replacement of a single part. It has a record of 6,000 miles continuous travel without replacement of parts. It has the power of the heaviest types, but is much lighter. You'll thoroughly appreciate what this means to you if you'll read some article or treatise on "Tire Troubles."

The design, upholstery, finish and riding qualities of the Elmore are equal to the very best that skill and money can produce. It has the only double cylinder motor in the world that is to any degree self-starting.

These are only a few of the points in which the **Pathfinder Elmore** is absolutely superior to any other automobile in the world, and as these points are the most vital, why should you pay more than \$1,250?

Personal Investigation will prove all we claim, and more. As a preliminary send for our literature which includes Complete Catalogue, "The Cruise of the Pathfinder" an interesting story of the Elmore's 6,000 mile trip New York to St. Louis and return, and the instruction treatise on the two-cycle engine, "Two Short Steps and One Long Jump." The three books free. 10 x 12 mounted photographs of the **Pathfinder Elmore** 10c. in stamps.
