

EXTREMES OF TEMPERATURE DO NOT AFFECT THE USEFULNESS OF

KNOX WATERLESS CARS

They are waterless and the cylinders are automatically cooled by the **Knox Patent Air-Cooling System**—the only ideal cooling system extant. Nothing to freeze in winter; no over-heating in summer. They are absolutely and always reliable at all seasons and under all conditions. There is evidence of it. Their record the past four years shows it. In design, Knox Cars are really sumptuous; in fitments, luxurious; in mechanism, simple; in service, unapproached. **Made in America, for Americans!** Their popularity attests their worth.
