

NO Oakland Sensible Six motor car, whether closed or open model, carries a pound of unnecessary weight. What is quite as important, no Oakland is impoverished of a pound that could contribute to its ability or its life. The true explanation of the prowess and popularity of Oakland is the exceedingly fine balance struck between its power and its burden. This balance pays a return in efficiency, in comfort and in economy, that is not exceeded anywhere in the present-day automobile.

Powered with the famous 44-horsepower, overhead-valve Oakland Sensible Six engine, this roomy and attractive touring car satisfies every transportation need. Its owners report returns of from 18 to 25 miles per gallon of gasoline and from 8,000 to 12,000 miles on tires.
