

# Announcing THE NASH FOUR

*THE new Nash Four is being manufactured in a great new Nash factory in Milwaukee. When operating at capacity, this plant will equal in volume of output the present big Nash factory at Kenosha where fifty thousand Nash Sixes are being built this year.*

*The same completeness of equipment and marked production ability which have made the Kenosha factory famous throughout the industry assure this new factory an immediate place in the front rank of the country's leading manufacturing institutions.*

## With Perfected Valve-in-Head Motor

**T**HE Nash Four is a quality motor car, light in weight but strongly and finely made of high grade materials.

Like the Nash Six it has two conspicuous and outstanding features—unusual power, due to its Nash Perfected Valve-in-Head Motor, and really exceptional beauty of design and finish.

Built in touring car, roadster, coupe and sedan models, this new Four gives a wide range to Nash motor cars both in variety and price.
