

"The supreme combination of all that is fine in motor cars."

If any one quality above all others distinguishes the truly fine car it is quietness of operation. For silent ease of motion results only from fine designing and fine craftsmanship—the utmost precision in every part of body and chassis.

The Packard is the supremely silent car. For it is designed and built to standards of precision expressed in terms of even one ten-thousandth of an inch. And Packard power—unsurpassed in any motor car—is so much more than ample

SILENCE that response to the driver's need or whim is instant, smooth and silent.

The practical result is true luxury of transportation—comfort of body and mind—the constant assurance that fine mechanism in perfect adjustment is operating smoothly and without strain.

Silence is a permanent Packard asset throughout the car's unusually long life. For the precision of Packard parts is protected anew each day by an almost automatic lubrication system.
