

The Cabriolet • Body by Fisher

*A remarkable car to own and drive
as any owner will testify*

The New Oakland All-American Six is a dependable car . . . with that dependability which results from sound engineering design. Evidence of this fact is exemplified by any number of features. By the rugged construction of cylinder block and crankcase which results in a rigid engine structure. By interchangeable bronze-backed main bearings of a type originated for use in aircraft engines. By a unique and effective system of crankcase ventilation. By a frame 5½ inches deep and rigidly cross-braced to counteract twisting force. By Fisher bodies of hardwood and steel construction.

Naturally a car so inherently dependable is a highly satisfactory car to own. It requires so little attention . . . it is so

inexpensive to maintain. And the same car . . . the New Oakland All-American . . . is equally desirable because of the performance it provides. For . . . in addition to impressive speed, power and acceleration . . . it offers smoothness, silence and balance not duplicated in any other car of such moderate price.

The Oakland-Pontiac dealer in your community can tell you an interesting story of the advanced engineering features embodied in the New Oakland All-American Six. That these features make the newest Oakland a remarkable car to own and drive, any owner you talk with will testify.

Consider the delivered price as well as the list price when comparing automobile values. Oakland-Pontiac delivered prices include only reasonable charges for delivery and financing.

The New Oakland All-American Six, \$1145 to \$1375, f. o. b. Pontiac, Michigan, plus delivery charges.
