

# Warwick Wright Says

## A brake that varies with road conditions

The more powerful the braking energy, the greater the tendency to locked wheels and skidding.

Stutz have solved this, like all other motor-ing problems.

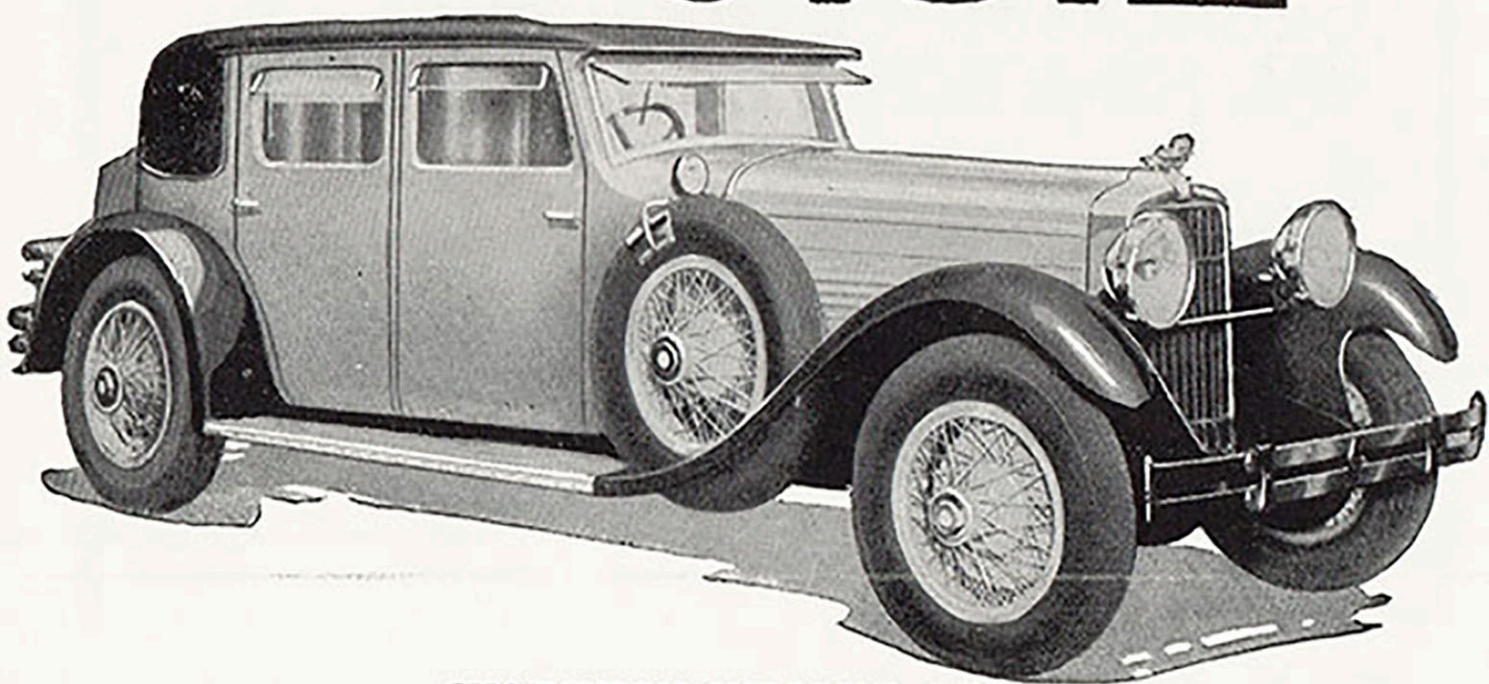

Is the ground wet? Then a turn of the adjuster on your dashboard eases the servo energy.

Are the roads dry, and you are driving fast? Then you can utilise the powerful servo motor to its full capacity.

You can vary Stutz brakes while driving—to suit road conditions.

This is but one of the many safety features that only the Stutz driver enjoys.
