

MANY A FINE CAR OWNER
IS SELECTING OAKLAND
FOR PERSONAL USE . . .

There are several reasons for the present trend toward Oakland V-8 as a personal car. For your personal car has a place all its own. It need not be as long or weighty perhaps as the largest cars you own, but it must meet your personal ideas of taste and style, and it must have the ability on the road to do the things that you ask.

We find that owners accustomed to fine automobiles see much in Oakland V-8 to meet their approval. They know its V-8 motor is in the certain trend of today's engine design for fine cars, boats or aircraft. They see the Syncro-mesh transmission as an evidence of thoughtfulness for their convenience.

In the Fisher-built bodies they find an understanding of their tastes and standards—a feeling of thorough care and of work well done.

It is an added virtue that a car like this may be had at a moderate price. Its expense for running and maintenance, too, comes within a sensible budget.

We want to turn one of these fine cars over to you for a two or three days' trial. Drive it anywhere you wish, and give it a real test.
