

**THE
FORD
V-8**

SAFETY IN ALL WEATHER

WHEN the rain comes down in slanting lines and chill November's blast makes fields and cities bare, you'll appreciate the substantial security of the Ford V-8. . . . The quick obedience of the car makes driving easier on gray and stormy days. You are safer on crowded city streets and the open road because of the all-steel body, safety glass, low center of gravity and powerful,

oversize brakes. . . . A further welcome feature is clear-vision ventilation. A turn of the window handles insures abundant fresh air without the semblance of a draft or dropping rain within the car. It helps, too, to prevent fogging of the windshield and windows. Just another of the many distinctive features that make the Ford V-8 such a satisfying car to own and drive.
