

New

The first British car with
**INDEPENDENT FRONT WHEEL
SPRINGING AND STEERING**

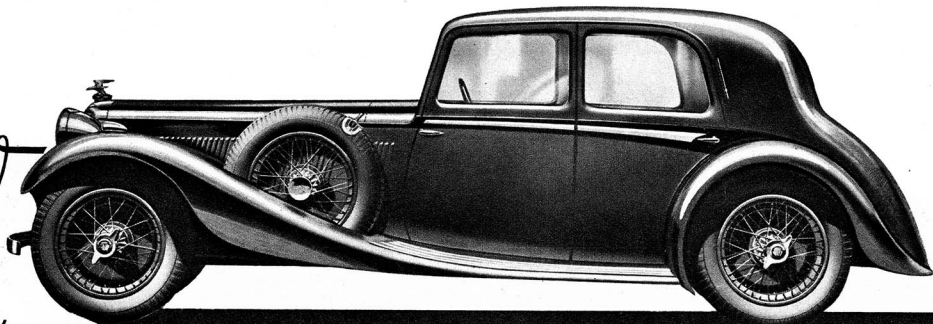

The first British car with
ALL SYNCHRO-MESH GEARBOX

NOW WITH ALL - SILENT PERFORMANCE
setting a new fashion in Sports Car design.

ALVIS engineers, who have been responsible for many of the most important achievements in motor-car design, have produced a New "Speed Twenty" which, without sacrificing a fraction of its characteristic high speed performance, is smooth and silent to a degree hitherto unknown in a car so fast. To temper the verve of "ALVIVACITY" with the virtue of SILENCE has resulted in a car of rare charm . . . its smooth, silent motion at all speeds, riding comfort and ease of control are of such excellence that driving strain even on the longest journey is entirely eliminated. We shall be pleased to send you full particulars of "Speed Twenty" Models at prices from £700. Other ALVIS Models at prices from £490. ALVIS CAR & ENGINEERING CO., LTD., COVENTRY.
