

IT'S STILL AMERICA'S MOST TALKED-ABOUT CAR

Now at a
**NEW LOW
PRICE**

THIS NEW Airflow De Soto is even more beautiful than the Airflow that captured the Grand Prix for beauty at Monte Carlo. A better performer than the Airflow that shattered 25 world speed records and traveled across America averaging 21.4 miles per gallon!

*Owners' praise based on
100,000,000 Airflow Miles!*

NO WONDER AIRFLOW is America's most talked-about car. It gives you motoring enjoyment ... thrills ... comfort ... that you cannot get in any other automobile, regardless of price.

That's obvious instantly. You never saw such bright, roomy interiors ... such big, deep, restful seats ... such exquisite modern styling. You can

fairly feel the fortress-like strength of the all-steel body around you, the safest ever built.

But take the wheel! Leap away from the other cars ... with the lazy, velvet ease of a cat ... go faster than you ever traveled before. Try to make that great 100-horsepower engine complain!

You hear no annoying windroar ... for Airflow is so perfectly streamlined that dust curls back on the road behind you, and rain runs up-hill on the windshield.

Bumpy roads no longer matter. You float over them in long, restful, rocking-chair glides. That's the magic of Airflow's Weight Distribution, and new tapered leaf springs. All-day driving is play ... and back-seat reading a habit ... with Airflow's 25,000 owners.

Why wait? Try a new Airflow De Soto with the Automatic Overdrive. All models now only \$1015*.

(Left) There's room for three both front and back ... with more comfort than any car ever offered.

(Below) All your luggage goes into this compartment back of the rear seat ... safe ... dust-proof.

THE SCIENTIFIC WEIGHT DISTRIBUTION originated by Airflow. Engine and seats are moved forward ... passengers ride cradled between the axles. You can travel all day on country roads without fatigue.
