

YEARS AHEAD OF ANY CAR IN AMERICA

AIRFLOW DE SOTO holds the famed Grand Prix for beauty, from Monte Carlo

25,000 Owners say Airflow is motoring's Greatest Thrill!

BODY AND FRAME are one piece...all-steel...structural strength even in the hood.

AIRFLOW'S WEIGHT DISTRIBUTION and tapered springs give world's smoothest ride.

WHEN YOU STEP into this Airflow, open your mind, your ears and eyes. You are about to experience a miracle of travel.

Look about you. This car interior is like a modern living room! Big wide sofas for seats, glistening in chromium frames...more room for six than any car ever offered before.

Suddenly you notice you're moving...and moving fast. Ruts, bumps, railroad tracks flow under you unnoticed...it's like floating on air.

You sail around sharp turns, yet the Airflow stays glued to the road. You barely touch the brakes and you stop instantly, straight as an arrow. Yes—you can read a newspaper in the back seat at any speed!

In ten minutes, you know Airflow is

years ahead of all the other cars!

You get all of these marvels in the new Airflow De Soto...a Chrysler Motors product. Now at a new low price...all models are only \$1015.* Your dealer will gladly let you drive one with the Automatic Overdrive.
