

and so-o-o to bed

A lot has happened—since you last bought an automobile. And it's all happened here in the Nash "600."

Just take the wheel and watch. The road starts flying backwards.

Look—!

The curves straighten out and the bumps unwrinkle up ahead. The hills lie down and the stuffy day turns sparkling fresh.

Look—your speedometer shows you're getting an incredible 25 to 30 miles on a gallon of gas at moderate highway speed!

Hey—what's happened anyway?

This car is built a new way. *Welded*

(not bolted together)—a single unit body and frame, free of dead weight and noise-making joints.

New, easier steering is here . . . and coil springing on all four wheels . . . new soundproofing . . . and the famous Nash Weather-Eye automatic "Conditioned Air" System! And a Nash can even sleep you tonight with Convertible Bed equipment. Just yawn . . . and so-o to bed!

Is it any wonder the swing today is to Nash? Smart people *like* this new kind of car—and the new kind of solid, friendly dealer who sells it. See him today about the brilliant new Nash "600" and the Nash Ambassador.

You'll be ahead
