

BUICK

PRESENTS THE

SKYLARK

AT THE

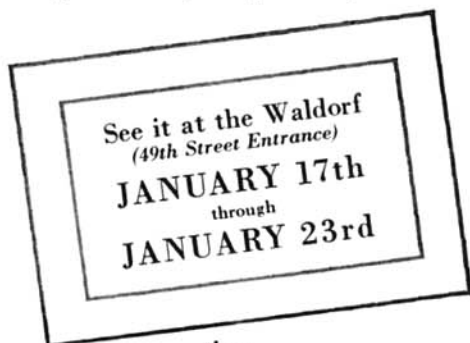

WALDORF

PERHAPS you read about this fabulous automobile in the newspapers some months ago as originating a new trend in modern American sports cars.

Now you can see it—not merely as a someday dream car, but as a motorcar in actual production.

It stands but five feet high with its Orlon top raised, yet it is six-passenger roomy.

then

Each chrome-plated wire wheel has forty gleaming individual spokes. Its interior trim is thick, soft, rich-grained leather. Its comfort is luxuriously casual.

As you would expect, this finest of Buicks is custom built with practically every modern automotive advance as standard equipment.

It has the world's newest V8 Engine. It has Twin-Turbine Dynaflo Drive. It has Power Steering and Power Brakes. It has hydraulic controls for the top, the windows and the front-seat adjustment. And it has a host of other "tomorrow" features.

Be sure to see it at the Waldorf, for it is a brand-new excitement in motoring. Although production is strictly limited, your order will be given every consideration. Price on request.
