## HER OWN CAR!

"Darling, how would you like a car of your own for your birthday?"

"Oh, sweetheart! That would be wonderful!"

"Fine. Now, what kind do you think you'd like?"

"Well, I decided a long time ago that if I ever had a car of my very own, it would be a lemon yellow Rogers convertible with—"

"A Rogers? Why a Rogers? Why not a Bates Eight like mine?"

"Sweetheart, I don't like yours. The upholstery—"

"What do you care about the upholstery? What you want is a good car with power brakes, power steering and a powerful motor. You know as well as I do that the Bates Eight is the best engineered car on the market."

"But Polly Kimball says that her Rogers—"

"Never mind Polly. She isn't buying this car."

"Well, the Bates Eight may be better but —"

"Of course it's better. And why do you want a convertible? I would think a coupe would be better for you. It would be cheaper to run and then the top wouldn't get so noisy and—"

"I thought it might be nice to drive around town with the top down so people could see me."

"What do you think you are—a college girl?"

"Look, sweetheart, let's not argue about it. I guess I'd like a lemon yellow coupe."

"Don't you think gray would be better? It wouldn't show the dirt."

"But—"

"Take my word for it. What you want is a gray Bates Eight with steel artillery wheels, automatic choke and carburetion, synchromatic transmission and thermostatic air conditioning."

"What kind of upholstery does it have?"

"I don't know, but don't worry about that. The main thing is that it's a good reliable car."

"But Polly Kimball says that her Rogers has gone 54,000 miles without—"

"For heaven's sake, forget Polly Kimball and her Rogers! Why do you always have to listen to what other people tell you? Can't you make up your own mind for a change?"

"All right, sweetheart, if I get a car, it will be a Bates Eight gray coupe. But, sweetheart—"

"What?"

"If you don't mind, I think I'd rather have a mink coat instead." BEN CASSELL ●

## STAHLWILLE
