

THERE'S A TREND-SETTING FORD PRODUCT IN YOUR FUTURE

CAN'T YOU JUST SEE YOURSELF IN A GALAXIE?

Galaxie 1962 — however you look at it — is the world's most economical luxury car. The Galaxie gives you trend-setting Thunderbird styling and performance. Its luxurious features surpass those of all but a few of the world's costliest cars. Its silence whispers of the care with which it is crafted. Yet Galaxie is reasonably priced as only a Ford can be. Servicing is reduced to a minimum — 30,000 miles on many items, no

more than twice a year or 6,000 miles on the rest. Galaxie even adjusts its own brakes. You can choose between the thrilling Thunderbird V-8 engine or a specially thrifty Six. Galaxie sets a new trend in easy-to-own luxury that may well belong in *your* future. See yourself in a Galaxie, soon, at your Ford Products dealer.
