

500/XL: everything but an afterburner!

Don't pop the clutch on the 405-horsepower version of the Galaxie 500/XL unless you're sure you've got a good bite. Those are big, hairy-legged horses and they can kick gravel and chunks of road a country mile. This stampede is on tap every second...even while you are burbling through town as quiet as a wisp of fog. This top-of-the-line engine is only part of the Galaxie power picture, however. There are four other performance-proved V-8's to choose from. Any one of the top four match up with a smooth four-cog box, or you can get the ease of Cruise-O-Matic on the three smaller ones. Either way you have a console-mounted gear selector inches away from your right hand, and Ford bolts your selection into the smoothest shell that ever whooshed down the pike. Ford craft doesn't stop here, though. Form-fitting bucket seats brace you for fast road work, rear seats are smoothly contoured, and there are seven special interior trims to please your eye... when you have time to look at them. Spend an hour with a Galaxie 500/XL on any stretch of road...it brings out the driver in just about everybody. Your Ford Dealer has the keys to this convincer. A PRODUCT OF

About that afterburner—  *who needs one?* MOTOR COMPANY
