1963 PRODUCTION CODE SYSTEM

In addition to the vehicle serial number, the patent plate includes the production code number. The patent plate is located on the left front door pillar between the hinges. On Galaxie models the patent plate is located on the left front door lock face. The production code number consists of the following items.

- A code representing the body type.
- A code letter representing the exterior body paint color - solid color.
Two letters if two tone.
- A code number representing the type and color of trim set.
- A code number designating the day of the month the unit should be completed.
- A code letter designating the month of the year.
- If a unit is built on a DSO, FSO, SPO (special orders), the complete order number will appear in the DSO space. (DSO - special orders)
- A code number representing the axle ratio.
- A code number representing the type of transmission.
