

MUSIC TO CHARM A COBRA!

The incredible roar of a Ford "289 High Performance" V-8 being tested at peak R.P.M. on the Shelby American engine dyno! A powerful, thundering, bellow that has shaken the ground and reverberated in a million thrilled road racing fans from LeMans to Riverside. A sound

as smooth as it is brutal; the culmination of thousands of hours of research, testing, and development, to field the most fantastic production sports car the world has ever known, the COBRA! It's the sound of precision engineering... of victory!
