

All roads are new when you Thunderbird

Pick out a runway and prepare to soar. Thunderbird's smooth, silent motion is the nearest thing to flight itself! And, within the new Thunderbird cockpit, you're airborne on the luxury of new contoured shell-design front seats. You can also specify a reclining passenger seat. The exclusive Silent-Flo ventilation system *pulls* fresh air through the car and *draws* stale air out. Other "extras" standard on Thunderbird include the Swing-Away steering wheel, power brakes, power steering, AM radio, heater, Cruise-O-Matic drive, retractable seat belts. If that gives you an idea that Thunderbird travel this year is more unique than ever, wait till you find out (at your Ford Dealer's) what it's like to Thunderbird.

Thunderbird 
unique in all the world
