

# Independent tests prove Ford Pickups ride best. Be independent. Test-drive one yourself.

Don't take our word. Test reports by a leading independent research firm show Ford pickups rode more smoothly than the other leading makes. And scientific techniques assured testing accuracy. But no need to take *their* word, either. Check out Ford's ride yourself. Look into Ford's Twin-I-Beam suspension at your Ford dealer's. See how the two front axles work independently, so that shocks at one wheel aren't passed to the other. Or to the driver. Next, get behind the wheel. Give that pickup as independent a ride test as you can. You'll feel better. And so will we. Because either way—our independent tests or yours—you'll have the word.

Each of Ford's two front axles is a forged steel I-beam. Husky radius rods help hold wheel alignment. Together, they make the most durable independent suspension in any pickup.
