

Rebel SST: The Excitement Machine

# Equipment for a Sunday afternoon.

Sunday afternoon.

The wife and kids want to go over the river and through the woods to grandmother's house. Fine.

But why should the drive be a drag? With the Rebel SST shown above, you can turn a prosaic trip into a grand touring experience.

Just order your SST with the 290 cubic inch Typhoon V-8; or the big-bore 343-CID version. Feed it with a Holley 2-bbl or a Carter 4-bbl (with 10.2:1 compression ratio). Add a hi-performance Camshaft Kit and 3.54 or 4.44 rear axle ratio. Pick a few options like dual exhausts, power

discs, electric tach, shoulder belts, extra-wide profile rubber, and a special handling package.

Your wife will be so impressed with all the standard safety features she'll never even notice you're taking the long way around. Check out a Rebel SST hardtop or convertible at your American Motors/Rambler Dealer. Next week maybe you'll be the one to say, "Let's go to grandma's."
