O.K., now it's your move!

Fairlane GT/A Hardtop

We really had the computer working overtime on the options for the Fairlane. Matching our handling package to the potential of those new super wide oval shoes. Making sure the front disc brakes have enough "feel" for real accurate road work. Tuning

a sweet-sounding set of duals. Pin-pointing shift points on the torque curve of that big V-8 so the SelectShift gearbox won't disgrace itself when you let it shift. Yes, we've given this new Fairlane GT/A the full treatment . . . now it's your turn!

You're way ahead
