

highway improvement program.

Project engineer: Olds 4-4-2. Complete with heavy-duty springs and shocks. Beefed-up wheels and shaft. Performance axle. Front *and rear* sway bars. White-line or wide-oval, red-line tires. Full 115" wheelbase. They're part and parcel of Oldsmobile's campaign to straighten corners, iron out curves, make flatlands out of

hills. Rounding out the package: Nimble 400 CID V-8. Louvered hood. Buckets. Carpets. Dual exhausts. Can be equipped with Rocket Rally Pac, UHV transistorized ignition system, superstock wheels, front disc brakes, vinyl top, and the like. Just pick a road that needs some improving. Then put an Olds 4-4-2 to the test.
