

Separates the men from the boys.

There are boy-type cars. And there are man-type cars. And Toronado is all man, all the way. Its styling is bold, brawny and massively male. Its handling is authoritative—thanks to the pulling power of front-wheel drive. Its ride is revolutionary, sure, unique—different from any other car.

Its engine is the strongest Rocket ever built: a bigger-than-ever, 455-cubic-inch V-8. Frankly, not everybody is cut out for a Toronado. But, then, who wants to be everybody?

Toronado.
Test drive the front-wheel-drive
"youngmobile" from Oldsmobile.
