## GIANT FUNNY CAR ISSUE

VOTE!

### 3rd ANNUAL ALL-STAR DRAG TEAM

**THE WINNING DIFFERENCE IS IN THE BAG**

All racers agree... the better the traction ... the lower the e.t. And, that's what Air Lift Air Springs are all about. You'll have lower e.t.'s when you install Air Lift Air Springs in the rear suspension because you'll be able to "chassis tune your car to the strip." You control chassis stiffness by adding air or bleeding air out in minutes.

**AIR LIFT AIR SPRINGS ARE DESIGNED TO DO A JOB, THAT JOB INCLUDES GIVING YOUR CAR**

- power to both rear wheels
- maximum traction
- straight arrow acceleration
- no wheel hop

Most of the pros run Air Lift... take a tip from Eddie Schartman, Hayden Proffitt, Royal Pontiac, Jere Stahl and hundreds more, install a set of Air Lift Air Springs and see the difference on your timing slip! You can chop your e.t. as much as .5 of a second with no other changes. Anyway you cut it ... that's a big edge. At your dealers now — cost \$50.00 or less.

New Performance Catalog tells you how to set your car for lower e.t.'s, only 25¢, includes decals. Air Lift T Shirt, Catalog and Decals, \$2.00. State Shirt Size Please.

## DEPARTMENTS

STRAIGHT SCOOP ....12	BUGGIN' OUT ..... 68
MAIL RUN .....14	CC/SHOPS .....110

The spectacular crash sequence involving Roland Leong's all-new "Hawaiian" Funny Car was captured by Dean Moon, long-time speed parts manufacturer and distributor, who "just happened to be on the scene." Dean admitted he didn't know whether to "run or shoot" at first, but the pictures are proof-positive that Dean stood his ground. Driver Larry Reyes was unhurt and you'll see why on pages 58-59. Bob Swaim caught the action off the Pomona line.
