

AEROPLANE BY LEONARDO DA VINCI

© Aston Martin Lagonda of North America Inc. 1986

TRANSPORTS OF FANTASY

It took the vision of a genius, the hands of craftsmen, and a great deal of time to realize the fantasy of powered flight. Today, craftsmanship and time remain indispensable elements in realizing the vision that is the Aston Martin Lagonda. Each car takes a full four months of individual hand sculpting, backed by seventy years of tradition. Which is why only twenty five new Lagondas will be available in the entire United States this year. And why it is simply the finest automobile that can be bought today.

The Aston Martin Lagonda.
An exclusive example of modern genius.
