

4 C

PURE MAGNETISM

THE VERY DESIGN THAT SO BEAUTIFULLY MINIMIZES DRAG ALSO MANAGES TO CREATE AN INTENSE, MAGICAL PULL; ALL EYES ARE HELPLESSLY DRAWN TO IT. PERFECTLY EMBODYING THE RACING AND CRAFTSMANSHIP LEGACY OF ITS MAKER, THE ALFA ROMEO 4C PERFORMS EXACTLY AS IT VISUALLY PROMISES: BEHIND ITS WHEEL, CONNECTIONS AMONG DRIVER, ROAD AND CAR COULDN'T BE STRONGER.

From a long line of sensational

For more than one hundred years, Alfa Romeo has earned its high-performance reputation through daring innovation. With a proven record of European and World Championships, those risks proved valuable on both track and street.

1967

2019

Elements of great performance

Aluminum
front subframe

Carbon fiber
passenger cell

Aluminum
engine frame

Designed in collaboration with the world's foremost racing chassis designers, the Alfa Romeo 4C Spider is innovative at its very core. Supercar DNA runs throughout, including a carbon fiber monocoque chassis, mid-engine design and aluminum subframes.

It begins with the solid foundation of a carbon fiber monocoque chassis. Laid by hand, this carbon fiber is three times stronger and seven times lighter than conventional steel. Front and rear aluminum subframes combine strength with weight-saving technologies. Sheet Molding Compound (SMC) is used for the outer body and is 20% lighter and more stable than steel — and also resists corrosion. The end result of these advanced technologies is incredible strength and remarkable weight efficiency — the overall curb weight is under 2,500 lb.

A competitive edge enhanced

OPTIMIZED AIRFLOW Advanced engine technology maximizes torque at low engine speeds and delivers more power in response to driver input. The control unit encourages fresh airflow from intake to exhaust. This improved circulation increases combustion efficiency and turbine speed while reducing turbo lag.

TURBOCHARGER A new-generation turbocharger and a pulse converter exhaust manifold use pressure waves to boost torque at low engine speeds. The microcast steel manifold and turbine operate at very high temperatures (over 1,000°F) — enabling low fuel consumption on medium-/high-speed highway trips. The wastegate valve adjusts turbo pressure control logic to suit driving conditions, minimizing pumping losses and maximizing efficiency.

AFTER-RUN PUMP The 4C uses an automatic cool-down system to protect its turbocharger. To prevent stagnating oil and damaging residue, Alfa Romeo has introduced an after-run pump. This electric pump is automatically controlled by the Electronic Control Unit (ECU) and keeps oil circulating through the turbocharger until it has cooled sufficiently.

ALFA TWIN-CLUTCH TRANSMISSION (TCT) The ALFA TCT 6-speed automatic transmission with a twin clutch and paddle shifters combines the instant power of a sequential shift with all the convenience of an automatic. Specially modified for use on the Alfa Romeo 4C, it features control software that ensures the fastest possible gearshifts under all conditions — as quick as 130 milliseconds. Gearshifts are more aggressive in the Dynamic and Race modes, yet are completed in the smoothest way possible on bends to avoid reducing stability.

*Perforated, cross-drilled,
self-ventilated discs, 12 x 1.10 in*

*MacPherson
rear suspension*

self-ventilated discs, 11.5 x 0.87 in*

Be one with the road

The 4C boasts an advanced ride control system, giving every driver extra street smarts.

Race-derived technical solutions optimize performance to deliver unrivaled driving pleasure. At the front, the Alfa Romeo 4C features a double-wishbone configuration that gives direct and unfiltered feedback from the road. At the rear, the advanced MacPherson suspension ensures superb road-holding and driving fun, even during the most extreme maneuvers. Both front- and rear-suspension systems are made from aluminum and high-strength steel. The high-performance braking system features perforated, self-ventilated discs and Brembo® brake calipers for supreme stopping power. And to ensure maximum grip and prevent skidding under all conditions, the 4C is fitted with staggered wheels: 17-inch and 18-inch or 18-inch and 19-inch, with larger tires on the rear for the best possible handling.

A commanding performance

Numerous features hone and improve each trip in 4C. The four-mode Alfa DNA Drive Pro Mode Selector creates a customized vehicle experience according to driving conditions or desired vehicle responsiveness: choose from its Dynamic, Natural, All-Weather or Race settings.

RACE This is the most extreme performance mode for 4C. By minimizing the interventions of electronic systems, it leaves the driver in complete command. Electronic Stability Control (ESC)^{1*} only intervenes during aggressive driving. Anti-Slip Regulation (ASR) is deactivated under acceleration and braking, while the Alfa Romeo electronic differential control system remains active for fast exits from bends.

NATURAL Designed for everyday use, its gearshift parameters are configured for maximum comfort and smoothness. In this mode, Auto-Up and Auto-Down functions shift at just the right engine speed. The Alfa Romeo electronic differential only cuts in during a significant loss of grip.

DYNAMIC True to its name, this mode helps deliver great driving performance with near-instant accelerator response and reduced gearshift times of up to 25%. The ESC¹ system only intervenes when drift angles put the car at risk.

ALL-WEATHER This mode ensures maximum safety under adverse weather conditions with gentle accelerator response. The ASR system prevents skidding by modifying power to match road speed when there is loss of grip.

The 4C is also fitted with Launch Control for masterful, high-performance standing starts. Launch Control is activated by pressing the brake pedal while pushing the accelerator pedal all the way down and squeezing the paddle on the left of the steering wheel. As soon as you release the brake, the system automatically controls the transmission, traction and power to maximize acceleration.

The influence of high culture

Perhaps it's no coincidence that Alfa Romeo was born in Milan, Italy — the fashion capital of the world. It's a place that understands that the heart must have a say in even the most practical decisions.

The Alfa Romeo 4C Spider continues the Alfa Romeo tradition of performance-oriented lines and proportions. Inspired by the 1967 Tipo 33 Stradale, considered by many to be one of the most beautiful cars ever made, the 4C is just as shapely and offers the classic Alfa Romeo V-shaped "plunging neckline" Scudetto grille. Front and rear overhangs are dramatically short, and dimensions are aerodynamically and dynamically optimized. The famous Alfa Romeo badge confirms what all these visual cues are saying: this is a legitimate sports car.

4C Spider Italia

The Italian design and craftsmanship tradition of Alfa Romeo is further accentuated in this limited edition model. Features unique to the 4C Spider Italia are Misano Blue Metallic paint, a front air intake in Piano Black and a rear diffuser in Piano Black. Special edition signatures include a "Spider Italia" graphic on the side panel, an aluminum dashboard insert with "4C Spider Italia" logo and a numbered badge certifying its place in production.

Incredibly, there are ways to rev up 4C Spider even more. The available Akrapovič dual-mode center-mounted exhaust with carbon fiber surround makes a memorable audio and visual statement. The race-inspired carbon fiber mirror covers signal a deep passion for motoring shared by both the owner and Alfa Romeo. Striking Bi-xenon projector headlamps serve to heighten 4C looks and the surrounding view, with sleek carbon fiber inserts and advanced lighting capability.

TECHNICAL SPECIFICATIONS

ENGINE	
Type	All-aluminum 1750 turbocharged 4-cylinder
Position	Mid-engine
Orientation	Transverse
Displacement (cc)	1742
Maximum power (hp)	237
Maximum torque (lb-ft at rpm)	258 between 2,200 – 4,250
DRIVING-MODE SELECTOR	
Type	Alfa DNA Pro Drive Mode Selector with Race mode
Positions	All-Weather, Natural, Dynamic, Race
TRANSMISSION	
Gearbox	ALFA TCT with dry dual clutch, paddle controls and Launch Control
Number of gears	6 + R

Alfa Romeo 4C design is a standout in any setting, starting with surroundings that were created specifically for its driver. Front and center, the 4C informs drivers with clear and precise driving stats from its full-digital instrument cluster — catching the eye with a Thin Film Transistor (TFT) display and available carbon fiber cluster surround. Command is in your hands with the available Sport steering wheel in leather with microfiber insert and Red stitching. Available Red leather-trimmed bucket seats are perfectly positioned to enlist the four-position Alfa DNA Pro Drive Mode Selector. Accentuating its exquisite lines and protecting it at the same time, the custom-cut Red car cover with Alfa Romeo 4C logo makes a practical yet gorgeous addition.

Fleece Jacket

1) Always drive carefully, consistent with conditions. Always wear your seat belt and obey traffic laws. 2) Always look before proceeding. An electronic drive aid is not a substitute for conscientious driving. Always be aware of your surroundings. 3) Always sit properly in designated seating positions with seat belts securely fastened at all times.
